

GRADE 10 • SENIOR SCHOOL

ICT LEARNER'S PAMPHLET

Information and Communication Technology

- 1 ICT and Society
- 2 Productivity Tools
- 3 Internet and Web Technologies

Based on the KICD Senior School Curriculum Design (2024)
A quick, easy-to-read guide for learners aged 14–16

Welcome, Grade 10 Learner!

Information and Communication Technology (ICT) is about how we use computers, phones, and the internet to **find, create, store, and share** information. This pamphlet gives you a simple summary of everything you will learn this year in ICT — organised into three big Strands. Use it to revise, prepare for lessons, and remind yourself why each topic matters in real life!

QUICK GLOSSARY — WORDS YOU WILL MEET

ICT	Information and Communication Technology — tools and systems used to collect, process, and share information.
Operating System	The main software that runs a computer or phone, e.g. Windows, macOS, Linux, Android, iOS.
Productivity Tools	Software that helps you do work efficiently, e.g. Word, PowerPoint, Publisher.
Internet	A worldwide network that connects computers so people can share information.
Netiquette	Good manners and polite behaviour when communicating online.
Digital Citizenship	Using technology safely, responsibly, and respectfully.

STRAND 1.0 — ICT AND SOCIETY

Total: 14 Lessons | Understanding what ICT is and how it shapes our world

1.1 Introduction to ICT

4 Lessons

Why it matters: Helps you understand the technology all around you and how organisations use it.

- Identify technologies used in communication (phones, radio, TV, internet).
- Explain the parts of ICT infrastructure in an organisation (hardware, software, networks, people).
- Use ICT tools to send and receive information on a topical issue.
- Appreciate the importance of ICT in society.

Key Question: How do different digital technologies facilitate communication and information exchange in a society?

1.2 Application Areas of ICT

4 Lessons

Why it matters: Shows you where ICT is used every day — from your school office to the supermarket.

- Identify where ICT is applied in society (health, business, education, security, banking).
- Relate ICT applications to solving problems in your community.
- Visit places like the school office or a supermarket to observe ICT in action.
- Appreciate ICT's role — and discuss its challenges too.

Key Questions: How is ICT used to solve problems in daily life? What are the trends in ICT application areas?

1.3 Operating Systems

6 Lessons

Why it matters: The operating system is the "boss" of every computer or phone — you must know how to use it well.

- Explain why operating systems are important (Windows, Linux, macOS, Android, iOS).
- Explore interfaces: GUI (icons/menus), command line, and menu-driven systems.
- Practice basic tasks: changing settings, opening apps, adjusting the desktop.
- Create, rename, move, copy, search for, and delete files and folders.
- Protect files using passwords, permissions, and backups.

Key Question: What role do operating systems play in supporting user operations in a digital device?

Strand 1 Values & Tips

Peace

Unity

Love

Responsibility

Social Justice

Integrity

- Practice creating and organising folders on any computer you can access — even at a cyber café.
- Always respect other people's opinions when discussing ICT topics in groups.
- Remember: online safety starts with YOU — be careful when searching for information online.

STRAND 2.0 — PRODUCTIVITY TOOLS

Total: 24 Lessons | Learning to create professional documents, slides, and publications

2.1 Word Processing

10 Lessons

Why it matters: You will use word processors (like MS Word, Google Docs) for essays, reports, and letters for the rest of your life.

- Explore tools: Microsoft Word, Google Docs, LibreOffice Writer, WPS Office.
- Create, save, and format a text document (fonts, paragraphs, page layout).
- Use spell checker, grammar checker, and auto-correct.
- Insert tables, images, headers/footers, page numbers, and a table of contents.
- Use "Track Changes" and comments to work together with classmates.
- Share a document as a hard copy, PDF, or email attachment.

Key Question: How can the key features in a Word Processor be optimised to enhance document production?

2.2 Presentation

6 Lessons

Why it matters: Great presentation skills will help you in class projects, competitions, and future job interviews.

- Explore tools: PowerPoint, Google Slides, LibreOffice Impress, Canva, Keynote.
- Create slides with text, images, shapes, charts, and multimedia.
- Add transitions, animations, and hyperlinks for interactivity.
- Use presenter view to manage notes and timing while presenting.
- Deliver a presentation confidently on a topical community issue.

Key Question: How can presentation software be used to create a visually appealing, informative, and interactive presentation?

2.3 Desktop Publishing (DTP)

8 Lessons

Why it matters: DTP tools help you design posters, flyers, magazines, and newsletters that look professional.

- Explore tools: Scribus, LibreOffice Draw, Microsoft Publisher, Adobe InDesign.
- Create and edit a publication (posters, cards, brochures).
- Use editing tools to give a professional finish.
- Apply mail merge to personalise publications.
- Share your publication as print, PDF, or digital upload.

Key Question: How does Desktop Publishing software make creating and designing professional-quality publications easier?

Strand 2 Values & Tips

Unity

Peace

Responsibility

Patriotism

Respect

- Practice formatting a real document — try designing your CV or a class notice.
- Design a poster for a school event using any DTP or presentation tool you can access.
- Always save your work often, and keep backup copies!

STRAND 3.0 — INTERNET AND WEB TECHNOLOGIES

Total: 22 Lessons | Using the internet safely, effectively, and responsibly

3.1 The Internet

6 Lessons

Why it matters: The internet connects you to the world — knowing how it works helps you use it wisely.

- Learn key terms: intranet, www, URL, server, browser, search engine, ISP.
- Discover internet services: e-commerce, education, social media, gaming, remote work.
- Learn what's needed to set up an internet connection (router, hotspot, cables).
- Use search engines effectively (keywords, filters, Boolean operators).
- Compose, send, and manage emails responsibly.

Key Question: How can the Internet be harnessed to facilitate communication and information gathering?

3.2 Digital Communication

10 Lessons

Why it matters: You already use chat apps and social media — this topic helps you use them for learning and collaboration too.

- Explore platforms: email, chat apps, video calls, social media, learning platforms.
- Use cloud tools for collaboration: Google Docs, Google Drive, Dropbox.
- Compare streaming platforms: YouTube, Netflix, Spotify.
- Create a podcast to share learning experiences.
- Appreciate how Artificial Intelligence (AI) is changing digital communication.

Key Question: How can various digital communication platforms be effectively used to create communication, connection, and learning?

3.3 Digital Citizenship

6 Lessons

Why it matters: Being a responsible digital citizen protects you and others from harm online.

- Learn and practice good netiquette (online manners).
- Spot bias, misinformation, and unreliable sources online.
- Manage your privacy settings and digital footprint.
- Practice healthy screen habits and good ergonomics.
- Learn how to conserve the environment (e-waste recycling, energy efficiency).

Key Question: How can I use digital technologies responsibly and responsively?

Strand 3 Values & Tips

Respect

Responsibility

Integrity

Peace

Unity

- NEVER share your passwords or personal information with strangers online.
- Think before you post — your digital footprint can last forever.
- Take regular breaks from screens to protect your eyes and posture.
- Be kind online — netiquette matters just as much as manners in person.

Total for Grade 10 ICT: **60 Lessons** across 3 Strands and 9 Sub-Strands.
Adapted for learners from the KICD Senior School Curriculum Design, Grade 10 ICT (June 2024).
Stay curious, stay safe, and enjoy exploring the digital world!
