

GRADE 10 LEARNER'S PAMPHLET

COMMUNITY SERVICE LEARNING

Serve Your Community. Grow Your Skills. Shape Your Future.

What is CSL?

- Community Service Learning (CSL) helps you learn by doing real work that benefits your community.
- You will explore Citizenship, Life Skills, Action Research and Social Entrepreneurship.
- It builds skills you can use for school, work and life — problem-solving, leadership, teamwork and communication.

Inside this pamphlet: 4 Big Topics • Key Words • Fun Activities • Questions to Think About

TOPIC 1: CITIZENSHIP

Citizenship is about knowing your community and playing an active, responsible role in it. In this topic, you will learn what CSL is, identify needs in your community, grow as a leader, and appreciate people from different cultures.

1.1 What is CSL? (6 lessons)

- A community is a group of people who share an identity, area, purpose or values.
- Community Service is helping out; Community Service Learning (CSL) means you also reflect and learn from the service.
- Communities can be at school, neighbourhood, regional, national, global or even online (virtual).

1.2 Community Needs (12 lessons)

- Needs can be environmental, political, social, economic or technological.
- You will map resources and stakeholders (people/organisations) who can help meet these needs.
- Keeping a database of needs, resources and partners helps plan good CSL projects.

1.3 Leadership Development (6 lessons)

- Good leaders are honest, good listeners, and take responsibility.
- Leadership styles include transformative, democratic, situational and servant leadership.
- You will help write CSL group guidelines and take part in electing leaders.

1.4 Intercultural Competence (8 lessons)

- Intercultural competence = cultural awareness + knowledge + sensitivity.
- Avoid stereotypes and misconceptions; practise tolerance, respect and empathy.
- You will engage community members from different cultures and plan an activity that builds unity.

 **Think About It:** *How can I promote the wellbeing of a community and learn from the experience?*

★ Key Words

- Community — a group sharing identity, place, purpose or values
- Civic identity — your sense of belonging and responsibility to a community
- Stakeholder — a person or group with an interest in a project
- Stereotype — an oversimplified idea about a group of people

TOPIC 2: LIFE SKILLS

Life skills help you understand yourself, get along with others, and make good choices every day — at home, school and in the community.

2.1 Self-Awareness in the Community (4 lessons)

- Public self-awareness is understanding how others see you (your mannerisms, words and decisions).
- A positive public image builds trust and respect.
- Sharing your story and listening to feedback helps you grow.

2.2 Conflict Resolution (6 lessons)

- Conflicts happen everywhere — at home, school and in the community.
- Fair approaches to solving conflict include listening, dialogue, compromise and mediation.
- Role-playing conflict scenarios helps you practise before facing real situations.

2.3 Responsible Decision-Making (6 lessons)

- Good decisions follow a process: identify the problem, consider options, think of consequences, choose and reflect.
- Responsible decisions consider your safety, values and the wellbeing of others.
- Skits and role play help you practise making responsible choices.

 **Think About It:** *How can I contribute to positive conflict resolution and make responsible decisions in my community?*

Try This!

- Write down one situation where you handled (or could have handled) a conflict peacefully.
- Share your public image reflection with a classmate and ask for honest feedback.
- Create a short skit with friends about making a responsible decision.

TOPIC 3: ACTION RESEARCH

Action Research is a simple way to study a problem in your community and find a practical solution — then reflect on what worked.

3.1 Introduction to Action Research (8 lessons)

- Action research is: Reflective, Continuous, Factual, Visible, Practical and Interesting.
- The cycle has 4 stages: PLAN → ACT → OBSERVE → REFLECT.
- You will study real case studies and design a mock action research project.

3.2 Problem Identification (10 lessons)

- Use scenarios to identify real problems affecting your community.
- Data collection tools include observation, tally sheets, checklists and online forms.
- Always handle data with honesty and integrity.

3.3 Implementation Process (18 lessons)

- Brainstorm possible solutions, then choose the most viable one through discussion and voting.
- Make an implementation plan: timeline, resources, roles and reporting.
- Carry out the plan, collect data, hold reflection meetings, and share your results (posters, videos, presentations).

 **Think About It:** *How can I use action research to identify and solve a real problem in my community?*

★ Key Words

- Action Research Cycle — Plan, Act, Observe, Reflect
- Data collection tool — a method used to gather information (checklist, tally, survey)
- Implementation plan — a step-by-step guide to carry out a solution

TOPIC 4: SOCIAL ENTREPRENEURSHIP

Social Entrepreneurship means using business ideas to solve community problems while creating value for people, not just profit.

4.1 Social Entrepreneurship Process (6 lessons)

- A social enterprise balances People, Profit, Practice and Planet.
- It differs from a normal business because it puts community benefit first.
- The process: identify opportunity → plan → mobilise resources → implement.

4.2 Opportunity Identification (10 lessons)

- Observe your community to spot needs that could become social enterprise ideas.
- Interview community members to check what resources already exist.
- Critique and refine your ideas before choosing the most viable one.

4.3 Social Enterprise Planning (12 lessons)

- A plan includes: purpose, product/service, key activities, impact, duties and resources.
- Present your plan to the community for feedback and buy-in.
- Revise your plan based on the feedback you receive.

4.4 Resource Mobilisation (8 lessons)

- List and cost the resources you need, then create a low-cost budget.
- Ways to get resources: donations, cost-sharing, fundraising, partnerships, income-generating activities.
- Improvise with locally available materials wherever possible.

 **Think About It:** *How can social entrepreneurship promote the welfare of my community, and how do I acquire the resources I need?*

★ Key Words

- Social Enterprise — a venture that solves a social problem while sustaining itself financially
- Resource Mobilisation — gathering the people, money and materials needed for a project
- Budget — a plan showing the costs of resources needed

QUICK RECAP

Community Service Learning has 4 strands and 120 suggested lessons across Grade 10:

- 1.0 Citizenship — Concept of CSL, Community Needs, Leadership Development, Intercultural Competence
- 2.0 Life Skills — Self-Awareness, Conflict Resolution, Responsible Decision-Making
- 3.0 Action Research — Introduction, Problem Identification, Implementation Process
- 4.0 Social Entrepreneurship — Process, Opportunity Identification, Planning, Resource Mobilisation

How You Will Be Assessed

- Teacher-made tests and oral questions
- Observation and portfolios of your work
- Project work (e.g. mock action research, social enterprise plans)

Core Competencies You Will Build

- Communication and Collaboration
- Digital Literacy
- Critical Thinking and Problem Solving
- Creativity and Imagination
- Self-Efficacy and Citizenship

Remember

- CSL is about learning by serving — the more you engage with real community issues, the more you grow.
- Reflect after every activity: What did I learn? What would I do differently?
- Values to live by: Respect, Responsibility, Unity, Integrity and Social Justice.
